QUICK FILTER

***Novo
Iso***

The taste of quality worldwide

Enjoy hot coffee anytime, anywhere!

The Novo and Iso coffee machines are developed to serve freshly brewed filter coffee, quickly and without the usage of water mains. The Novo brews directly into a glass decanter of 1.7 L and the Iso brews directly into a vacuum flask of 2 L.

The two self-regulating hot plates of the Novo keep the coffee at the right temperature. The Iso has a 2 L vacuum flask which preserves the flavour and ensures that the coffee stays warm.

Both machines are user-friendly and do not require a lot of maintenance. Thanks to the manual-fill water system you can place the Novo and Iso units anywhere!

Specifications	Novo	Iso
Holding capacity	2 decanters of 1.7 L (24 cups)	1 vacuum flask of 2 L (14 cups)

Dimensions (wxdxh)	214x391x424 mm	214x391x465 mm

The HP –hot plate unit from Bravilor Bonamat– is a stand-alone unit. You can easily place it on a worktop, counter or table. The two electric heating elements keep your coffee inside the decanters warm.

The self-regulating functionality ensures the perfect coffee temperature according to the capacity inside the decanters.

Each hot plate can be turned on/off separately.

Your Bravilor Bonamat dealer

Optional

- HP hot plate unit

We advise

- Bravilor Bonamat paper filter cups
- Bravilor Bonamat *Renegite* for descaling
- Bravilor Bonamat *Cleaner* for cleaning
